Skill Item and Knowledge Items / Skill Proficiency

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Project Scope Management** **[Knowledge Items]** -Scope Planning -Scope Definition -Create WBS -Scope Verification -Scope Control	Level 7	Able to perform the project successfully, by carrying out Scope Planning, Scope Definition, Create WBS, Scope Verification, and Scope Control, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully, by carrying out Scope Planning, Scope Definition, Create WBS, Scope Verification, and Scope Control, as a person responsible for the project with 50 but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out Scope Planning, Scope Definition, Create WBS, Scope Verification, and Scope Control, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more,
	Level 4	Able to carry out Scope Planning, Scope Definition, Create WBS, Scope Verification, and Scope Control, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Scope Planning, Scope Definition, Create WBS, Scope Verification, and Scope Control under the direction of the project manager (or leader), as a project member.

Skill Proficiency/Knowledge Items of Project Management

Specialty field: System development	

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Project Time Management** **[Knowledge Items]** -Activity Definition -Activity Sequencing -Activity Resource Estimating -Activity Duration Estimating -Schedule Development -Schedule Control	**Level 7**	Able to perform the project successfully, by carrying out Activity Definition, Activity Sequencing, Activity Resource Estimating, Activity Duration Estimating, Schedule Development and Schedule Control, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully, by carrying out Activity Definition, Activity Sequencing, Activity Resource Estimating, Activity Duration Estimating, Schedule Development, and Schedule Control, as a person responsible for the project with 50 or more but less than 500 persons during peak periods or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out Activity Definition, Activity Sequencing, Activity Resource Estimating, Activity Duration Estimating, Schedule Development, and Schedule Control, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out Activity Definition, Activity Sequencing, Activity Resource Estimating, Activity Duration Estimating, Schedule Development, and Schedule Control, as a person responsible for the projects with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Activity Definition, Activity Sequencing, Activity Resource Estimating, Activity Duration Estimating, Schedule Development, and Schedule Control under the direction of the project manager (or leader), as a project member .

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●Project Cost Management [Knowledge Items] -Cost Estimating -Cost Budgeting -Cost Control	Level 7	Able to perform the project successfully, by carrying out Cost Estimating, Cost Budgeting, and Cost Control, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out Cost Estimating, Cost Budgeting, and Cost Control, as a person responsible for the project from 50 but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out Cost Estimating, Cost Budgeting, and Cost Control, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or annual contract value of 100 million yen or more.
	Level 4	Able to carry out Cost Estimating, Cost Budgeting, and Cost Control, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Cost Estimating, Cost Budgeting, and Cost Control under the direction of project manager (or leader), as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●Project Quality Management [Knowledge Items] -Quality Planning -Perform Quality Assurance -Perform Quality Control	Level 7	Able to perform the project successfully, by carrying out Quality Planning, Perform Quality Assurance, and Perform Quality Control as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out Quality Planning, Perform Quality Assurance, and Perform Quality Control, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more,
	Level 5	Able to carry out Quality Planning, Perform Quality Assurance, and Perform Quality Control, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out Quality Planning, Perform Quality Assurance, and Perform Quality Control, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Quality Planning, Perform Quality Assurance, and Perform Quality Control under the direction of the project manager (or leader), as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Project Human Resource Management** **[Knowledge Items]** -Human Resource Planning -Acquire Project Team -Develop Project Team -Manage Project Team	Level 7	Able to perform the project successfully by carrying out Human Resource Planning, Acquire Project Team, Develop Project Team, and Manage Project Team, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out Human Resource Planning, Acquire Project Team, Develop Project Team, and Manage Project Team, as a person responsible for the project with 50 or more but less 500 persons during peak periods, or an annual contract value of 500 million yen or more,
	Level 5	Able to by carry out Human Resource Planning, Acquire Project Team, Develop Project Team, and Manage Project Team, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out Human Resource Planning, Acquire Project Team, Develop Project Team, and Manage Project Team, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to act under the policy and instructions of the project manager (or leader) as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●Project Communications Management [Knowledge Items] -Communications Planning -Information Distribution -Performance Reporting -Manage Stakeholders	Level 7	Able to perform the project successfully by carrying out Communications Planning, Information Distribution, Performance Reporting, and Manage Stakeholders, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out Communications Planning, Information Distribution, Performance Reporting, and Manage Stakeholders, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more,
	Level 5	Able to carry out Communications Planning, Information Distribution, Performance Reporting, and Manage Stakeholders, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out Communications Planning, Information Distribution, Performance Reporting, and Manage Stakeholders, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Information Distribution and Performance Reporting under the direction of the project manager (or leader) as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●Project Risk Management [Knowledge Items] -Risk Management Planning -Risk Identification -Qualitative Risk Analysis -Quantitative Risk Analysis -Risk Response Planning -Risk Monitoring and Control	Level 7	Able to perform the project successfully, by carrying out Risk Management Planning, Risk Identification Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more,
	Level 6	Able to perform the project successfully, by carrying out Risk Management Planning, Risk Identification, Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out Risk Management Planning, Risk Identification, Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out Risk Management Planning, Risk Identification, Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out Risk Monitoring and Control as a project member under the direction of the project manager (or leader).

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Project Procurement Management** **[Knowledge Items]** -Plan Purchases and Acquisitions -Plan Contracting -Request Seller Responses -Select Sellers -Contract Administration -Contract Closure	Level 7	Able to perform the project successfully, by carrying out procurement management such as Plan Purchases and Acquisitions, Plan Contracting, Request Seller Responses, Select Sellers, Contract Administration, and Contract Closure, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out procurement management such as Plan Purchases and Acquisitions, Plan Contracting, Request Seller Responses, Select Sellers, Contract Administration, and Contract Closure, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more,.
	Level 5	Able to carry out procurement management such as Plan Purchases and Acquisitions, Plan Contracting, Request Seller Responses, Select Sellers, Contract Administration, and Contract Closure, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out procurement management such as Plan Purchases and Acquisitions, Plan Contracting, Request Seller Responses, Select Sellers, Contract Administration, and Contract Closure, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out procurement management such as Plan Purchases and Acquisitions, Plan Contracting, Request Seller Responses, Select Sellers, Contract Administration and Contract Closure under the direction of the project manager (or leader), as a project member .

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Analysis of Business Operations** **[Knowledge Items]** -Analysis of business operation requirement -Analysis of technical requirements -Informatization and management -Industry knowledge -Generic business content -Latest generic business trends	Level 7	Able to carry out complex and advanced analysis of business operation and technical requirements from the perspective of industry and technical trends, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to carry out complex and advanced analysis of business operation and technical requirements from the perspective of industry and technical trends, as a person responsible for the project from 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out analysis of business operation and technical requirements, as a person responsible for the project with10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out analysis of business operation and technical requirements as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to carry out analysis of business operation and technical requirements in the assigned area, as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] **●Utilization of consulting techniques** **[Knowledge Items]** -Selection and Utilization of consulting techniques -Understanding and utilization of analysis tools and models	Level 7	Able to perform the project successfully by carrying out selection and utilization of consulting techniques suitable for project characteristics, definition and practice of processes, definition and creation of deliverables, and application of consulting skills, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project successfully by carrying out selection and utilization of consulting techniques suitable for project characteristics, definition and practice of processes, definition and creation of deliverables, and application of consulting skills, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more
	Level 5	Able to perform the project by carrying out selection and utilization of consulting techniques suitable for project characteristics, definition and practice of processes, definition and creation of deliverables, and application of consulting skills, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more,
	Level 4	Able to perform the project, by carrying out selection and utilization of consulting techniques suitable for project characteristics, definition and practice of processes, definition and creation of deliverables, and application of consulting skills, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen
	Level 3	Able to perform the project by carrying out utilization of consulting skills as a project member

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management	
Skill Item and Knowledge Items	**Skill Proficiency**	
[Job category common skill item] ●Knowledge management and utilization [Knowledge Items] -Management and utilization of knowledge	Level 7	Able to perform the project effectively and with high quality by carrying out database creation of knowledge, its utilization, maintenance, and management, in the whole process from project preparation, start to completion, and post completion, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to perform the project effectively and with high quality by carrying out database creation of intellectual property, its utilization, maintenance, and management, in the whole process from project preparation, start to completion, and post completion, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to perform the project effectively and with high quality, by carrying out database creation of knowledge, its utilization, maintenance, and management, in the whole process from project preparation, start to completion, and post completion, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to perform the project effectively and with high quality, by carrying out database creation of knowledge, its utilization, maintenance, and management, in the whole process from project preparation, start to completion, and post completion, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to perform database creation of knowledge, its utilization, maintenance, and management under the direction of the project manager (or leader), as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●**Leadership** **[Knowledge Items]** -Leadership	Level 7	Able to carry out the project by issuing instructions and orders, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to carry out the project by issuing instructions and orders, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out the project by issuing instructions and orders, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to carry out the project by issuing instructions and orders, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to participate in the project by understanding leadership fundamentals as a project member.

Specialty field: System development	Skill Proficiency/Knowledge Items of Project Management

Skill Item and Knowledge Items	Skill Proficiency	
[Job category common skill item] ●Communication [Knowledge Items] -2-Way communication -Transmission of information -Organization, analysis, and retrieval of information	Level 7	Able to speak about the project and perform proper 2-way communication, information transmission, and organization, analysis, and retrieval of information with the person in charge of customer side, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to carry out proper 2-way communication, information transmission, and organization, analysis, and retrieval of information with the person in charge of customer side, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to carry out proper 2-way communication, information transmission, and organization, analysis, and retrieval of information, with the person in charge of customer side, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to perform the project by keeping team communication with the project members, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to perform the project by keeping team communication with the project team members, as a member.

Skill Proficiency/Knowledge Items of Project Management

Specialty field: System development	

Skill Item and Knowledge Items	Skill Proficiency
[Job category common skill item] ●Negotiation [Knowledge Items] -Negotiation	**Level 7** — Able to lead complicated negotiations about the project with the person in charge of customer side, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6 — Able to carry out negotiations and obtain an agreement on the project with the person in charge of customer side, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5 — Able to carry out negotiations on the project with the person in charge of customer side, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4 — Able to carry out negotiations on the project by keeping team communication with the project members, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3 — Able to carry out negotiations across the project team as a project member.

Skill Proficiency/Knowledge Items of Project Management

Specialty field:
System development

Skill Item and Knowledge Items	Skill Proficiency	
[Specialty field specific skill item] ●Design and development management of IT solutions **[Knowledge Items]** -Software engineering -Utilization and practice of software development techniques -Requirement definition techniques -Technological problem solving method -Latest technology trends -Latest trends in IT market -Latest generic business trends -Latest trends in business application package -Implementation and inspection of security systems	Level 7	Able to lead design and development management of IT solution, as a person responsible for the project with 500 or more persons during peak periods, or an annual contract value of 1 billion yen or more.
	Level 6	Able to lead design and development management of IT solution, as a person responsible for the project with 50 or more but less than 500 persons during peak periods, or an annual contract value of 500 million yen or more.
	Level 5	Able to lead design and development management of IT solution, as a person responsible for the project with 10 or more but less than 50 persons during peak periods, or an annual contract value of 100 million yen or more.
	Level 4	Able to lead design and development management of IT solution, as a person responsible for the project with less than 10 persons during peak periods, or an annual contract value of less than 100 million yen.
	Level 3	Able to perform design and development management of IT solution, as a project member.
